

The College of Science and Engineering Technology would like to recognize the Following Faculty members within the School of Agriculture for their contributions pertaining to community outreach and youth involvement: Dr. Mark Anderson, Dr. Marcy Beverly, Dr. Stanley Kelley, Dr. Kyle Stutts and Dr. Phil Urso. During the Fall 2020 Semester, these Animal Science faculty members developed an online learning series covering various topics related to beef cattle within the agricultural industry.

This online beef cattle learning series was developed as an education tool intended to reach youth programs amidst the Covid-19 pandemic where face-to-face instruction could not be facilitated. The learning series was made available to 11 school districts in the region through the AgriLife Extension Service; the program successfully reached a total of 364 students who earned high school credit while also gaining a glimpse into the agricultural curriculum available at Sam Houston State University. The series was delivered to students via 11 learning modules relating to topics such as: Food Science and Safety, Anatomy and Physiology, Beef Cattle Nutrition, Forage Quality and more.

For information regarding the beef cattle learning series, please contact the School of Agricultural Sciences at SHSU or Dr. Stanley Kelley directly. If you would like more information on the AgriLife Extension Service, please visit <https://agrilifeextension.tamu.edu/>.
